- Educational programs
- Access to exclusive HHFMA ListServ addressing industry concerns
- And more...

For more information, visit hhfma.org or call 202-547-7424.

Introduction

Treating wound care patients in the home is complex and costly. Historically agencies have shied away from treating these patients as they often resulted in financial losses. The introduction of PDGM has made wound care patients the highest reimbursed clinical grouping. This industry leading group of panelists will discuss the challenges in treating wound care patients in the home and how technology can assist in improving outcomes, reducing costs, and improving margins.
